

INBRED MAIZE LINE PH0GC

Maryse Lafouasse

Abstract

5 An inbred maize line, designated PH0GC, the plants and seeds of inbred maize line PH0GC, methods for producing a maize plant, either inbred or hybrid, produced by crossing the inbred maize line PH0GC with itself or with another maize plant, and hybrid maize seeds and plants produced by crossing the inbred line PH0GC with another maize line or plant and to methods for producing a maize plant containing in its genetic
10 material one or more transgenes and to the transgenic maize plants produced by that method. This invention also relates to inbred maize lines derived from inbred maize line PH0GC, to methods for producing other inbred maize lines derived from inbred maize line PH0GC and to the inbred maize lines derived by the use of those methods.
